### Management commentary [text block]

## FIRST QUARTER 2025 RESULTS

We are pleased with the first quarter results, as GRUMA has been able to overcome volatile market dynamics arising from the uncertainty perceived in the U.S economy, which has weakened consumer sentiment and added selectivity. Our Better for You SKU line has been evolving favorably and in line with historic growth, supported by still healthy tortilla retail growth, while volumes continue to recover in our food service channel. GIMSA, our subsidiary in Mexico, experienced a slowdown, while our subsidiary in Central America continues to show strong momentum and requires additional capacity to meet the demand. Europe again delivered positive performance following its distribution strategy, and in the Asia and Oceania division, Australia had an excellent quarter that offset China's performance in the period. Although net sales were impacted by the effect of the weakness of the Peso in the Mexican subsidiaries, GRUMA achieved 4% EBITDA growth and 17.8% EBITDA margin for the quarter, or 6% growth in EBITDA per ton terms. We remain confident that due to GRUMA's global footprint, it is firmly positioned to face the challenges ahead.

## HIGHLIGHTS

Consolidated Financial Highlights	YoY		
	1Q25	1Q24	VAR (%)
Income Statement (USD millions)			
Volume (thousand tons)	1,062	1,075	(1)

---

## Disclosure of nature of business [text block]

---

GRUMA, S.A.B. de C.V., is one of the world's leading tortilla and corn flour producers. With leading brands in most of its markets, GRUMA has operations in the United States, Mexico, Central America, Europe, Asia and Oceania.

---

## Disclosure of management's objectives and its strategies for meeting those objectives [text block]

---

Our strategy is to focus on our core business—corn flour and tortilla—as well as to expand our product portfolio towards the flatbreads category in general. We will continue taking advantage of the increasing popularity of Mexican food and, more importantly, tortillas, in the U.S., European, Asian and Oceanian markets. We will also continue taking advantage of the adoption of tortillas by the consumers of several regions of the world for the preparation of different recipes other than Mexican food. Our strategy includes the following key elements:

**Expand in the Tortilla Market in the United States:** We believe that the size and growth of the tortilla market in this country still offer us significant opportunities for expansion, mainly in the retail channel, looking to continuously innovate our products with emphasis on healthy alternatives based on the preferences of our customers.

**Enter and Expand in the Tortilla, Flatbread Markets and Flavored Corn Chips in Europe, Asia and Oceania:** We believe that markets in other continents such as Europe, Asia and Oceania offer us significant opportunities. We believe our current operations will enable us to better serve our customers in those regions, with fresher products and respond more quickly to their needs.

**Gradually Enter the Flat Bread and Flavored Corn Chips Markets in the United States and Mexico.**

**Maintain MISSION® and GUERRERO® Tortilla Brands as the First and Second National Brands in the United States and Position our Mission Brand in Other Regions of the World:** We intend to achieve this by increasing our efforts at building brand name recognition, and by expanding and having presence in more supermarket chains.

**Encourage Transition from the Traditional Cooked-Corn Method to the Corn Flour Method as Well as New Uses for Corn Flour:** GRUMA introduced the corn flour method for the production of tortilla and other corn-based products to the market. We believe that there is still much growth potential and that the transition from the Traditional Method to the corn flour method of making tortillas and other corn-based products, is the primary opportunity for increased corn flour sales, particularly in Mexico. We continue working in expanding the use of corn flour in the manufacture of different types of products.

**Invest in our Core Business and Focus on Optimizing Operational Matters:** We intend to focus our capital expenditure program on our core business to enable us to meet future demand, consolidate our leading position in the industry and continue generating returns to the shareholders above our cost of capital.

---

## Disclosure of entity's most significant resources, risks and relationships [text block]

---

Our financial condition and results of operations may be influenced by some of the following factors:

- level of demand for tortillas and corn flour;
- increase or decrease in the Hispanic population in the United States;
- increases in Mexican food consumption by the non-Hispanic population in the United States; and use of tortillas in non-Mexican cuisine in the United States, Europe, Asia and Oceania;
- costs and availability of corn and wheat flour;
- costs of energy and other related products;
- acquisitions, plant expansions and divestitures;
- effects of government initiatives and policies;
- effects from variations of interest rates and exchange rates;
- volatility in corn and wheat prices and energetics costs;
- competition from tortilla manufacturers, especially in the United States;
- competition in the corn flour business; and
- general economic conditions in the countries where we operate and worldwide.

---

## Disclosure of results of operations and prospects [text block]

### FIRST QUARTER 2025 RESULTS

*We are pleased with the first quarter results, as GRUMA has been able to overcome volatile market dynamics arising from the uncertainty perceived in the U.S economy, which has weakened consumer sentiment and added selectivity. Our Better for You SKU line has been evolving favorably and in line with historic growth, supported by still healthy tortilla retail growth, while volumes continue to recover in our food service channel. GIMSA, our subsidiary in Mexico, experienced a slowdown, while our subsidiary in Central America continues to show strong momentum and requires additional capacity to meet the demand. Europe again delivered positive performance following its distribution strategy, and in the Asia and Oceania division, Australia had an excellent quarter that offset China's performance in the period. Although net sales were impacted by the effect of the weakness of the Peso in the Mexican subsidiaries, GRUMA achieved 4% EBITDA growth and 17.8% EBITDA margin for the quarter, or 6% growth in EBITDA per ton terms. We remain confident that due to GRUMA's global footprint, it is firmly positioned to face the challenges ahead.*

## HIGHLIGHTS

Consolidated Financial Highlights	YoY		
	1Q25	1Q24	VAR (%)
Income Statement (USD millions)

Net Sales	1,548.5	1,647.3	(6)
Operating Income	217.1	206.0	5
Operating Margin (%)	14.0%	12.5%	150 bp
EBITDA <sup>1</sup>	276.0	264.4	4
EBITDA Margin (%)	17.8%	16.0%	180 bp
Majority Net Income	125.9	111.0	13

<sup>1</sup> EBITDA = operating income + depreciation, amortization and impairment of long lived assets +/- other expenses (income) unrelated to core business operations.

## CONSOLIDATED RESULTS OF OPERATIONS

1Q25 versus 1Q24

**Sales volume** decreased 1% compared to 1Q24 to 1,062 thousand metric tons, driven mainly by (1) price sensitivity in the food service channel in the U.S.; and (2) volume contraction at GIMSA and the corn milling division in Europe.

**Net sales** decreased 6% to US\$1.5 billion mainly due to (1) the translation effect of the depreciation of the Mexican Peso against the U.S. dollar at GIMSA; (2) lower volumes at the U.S. food service channel; and (3) lower revenue stemming from GIMSA. Sales from non-Mexican operations represented 75% of consolidated figures.

**Cost of sales** (“COGS”) decreased 10% to US\$932.6 million due to efficiencies in the US, GIMSA and the Central America subsidiaries. As a percentage of net sales, COGS improved to 60.2% from 62.7%.

**Selling, general and administrative expenses (“SG&A”)** remained flat at US\$405.4 million as a result of a weaker Mexican Peso, when translating GIMSA results into U.S. dollars. As a percentage of net sales, SG&A increased to 26.2% from 24.7%.

**Other income, net**, was US\$6.6 million compared to an expense of US\$0.9 million last year. This resulted mainly from insurance claims on damaged assets in prior quarters.

**Operating income** increased by 5% to US\$217.1 million. Operating margin expanded by 150 basis points to 14.0% from 12.5%.

**EBITDA** increased 4% to US\$276.0 million, and EBITDA margin increased 180 basis points to 17.8% from 16.0%. It should be noted that EBITDA growth was partially offset by the translation effects of a weaker Mexican peso into US dollars at GIMSA. EBITDA from non-Mexican operations represented 83% of consolidated figures.

**Net comprehensive financing cost** decreased 5% to US\$30.3 million, mainly due to a decline in debt outstanding, reflecting lower debt payments and the effects of a weaker peso on peso-denominated debt and monetary positions on the balance sheet.

**Income taxes** were US\$61.1 million, a 3% decrease compared to 1Q24, due to a decline in inflation. The effective tax rate for the quarter was 32.7% compared to 36.2% in 1Q24.

**Majority net income** increased 13% to US\$125.9 million.

*GRUMA once again delivered positive results during the first quarter of the year, with 4% EBITDA growth or a 6% rise in EBITDA per ton. This was achieved despite the current uncertainties regarding the U.S. economic outlook and its impact on the consumer. Given its geographical diversification and global reach, GRUMA is in a privileged position to face and overcome the challenges it may face during the year.*

## SUBSIDIARY RESULTS OF OPERATIONS

1Q25 versus 1Q24

### GRUMA USA

Selected Income Statement Items (USD millions)		YoY					
		1Q25	%	1Q24	%	VAR (\$)	VAR (%)
<b>GRUMA USA</b>	Sales Volume <sup>1</sup>	383		390		(6)	(2)
Corn flour, tortillas, and other	Net Sales	879.7	100.0	902.9	100.0	(23)	(3)
	Operating Income	150.7	17.1	145.5	16.1	5	4
	EBITDA	193.4	22.0	181.6	20.1	12	6

<sup>1</sup> All sales volume figures are expressed in thousand metric tons.

**Sales volume** decreased 2% to 383 thousand metric tons on the back of weaker consumer sentiment reflecting inflationary pressures and the potential of a softer economic outlook. This effect was more weighted in the food service channel, which has been gradually recovering from price sensitivity dynamics, while the retail channel showed a partial slowdown in 1Q25. In spite of this, the growth at GRUMA's Better for You line, continues to be in line with historic standards and a main driver for future growth.

**Net sales** decreased 3% compared to 1Q24, to US\$879.7 million due to (1) lower volumes sold; and (2) a lower average price in the sales mix as a result of a weaker consumer sentiment in 1Q25.

**Cost of sales** decreased 6% to US\$488.2 million due mainly to efficiencies across this subsidiary's cost structure.

**SG&A** increased 2% to US\$245.6 million due to higher sales expenses in connection to (1) higher marketing costs; and (2) elevated logistics and distribution costs. As a percentage of net sales, SG&A increased to 27.9% from 26.6% in 1Q24.

**Operating income** increased 4% to US\$150.7 million, and operating margin grew 100 basis points to 17.1% from 16.1%.

**EBITDA** increased 6% to US\$193.4 million, and EBITDA margin increased to 22.0% from 20.1% in 1Q24.

*Our subsidiary in the U.S. finished the quarter with solid results, growing EBITDA by 6% and EBITDA per ton by 8%, despite facing uncertainties in the U.S. economic outlook and its potential effects on a weaker consumer. The Better for You product line, continues with its robust performance and resilience, and is the main driver of retail growth.*

## GIMSA

Selected Income Statement Items (USD millions)		YoY					
		1Q25	%	1Q24	%	VAR (\$)	VAR (%)
<b>GIMSA</b> <sup>1</sup>	Sales Volume <sup>2</sup>	512		524		(13)	(2)
Corn flour and other	Net Sales	394.0	100.0	403.0	100.0	(9)	(2)
	Operating Income	28.4	7.2	29.5	7.3	(1)	(4)
	EBITDA	39.7	10.1	40.0	9.9	(0)	(1)

<sup>1</sup> Convenience translation at the exchange rate of Ps. 20.3182/dollar as of March 31, 2025. For further details see "Accounting Procedures".

<sup>2</sup> All sales volume figures are expressed in thousand metric tons.

**Sales volume** decreased 2% to 512 thousand metric tons, as a result of delays in the execution on some of GRUMA's clients' budgets for the quarter.

**Net sales** decreased 2% to US\$394.0 million, relative to 1Q24, in line with lower volumes sold.

**Cost of sales** decreased 6% to US\$286.5 million, mainly due to efficiencies.

**SG&A** increased 20% to US\$80.8 million, resulting mainly from additional corporate and administrative expenses. As a percentage of net sales, SG&A increased to 20.5% from 16.8%.

**Other income, net**, was US\$1.6 million compared to an expense of US\$0.7 million in 1Q24, due to the payment of claims from damaged assets in prior quarters.

**Operating income** decreased 4% to US\$28.4 million, and operating margin was 10 basis points lower at 7.2% from 7.3% in 1Q24.

**EBITDA** decreased 1% to US\$39.7 million from US\$40.0 million, and EBITDA margin increased 20 basis points to 10.1% from 9.9%.

*Our Mexican operation is stable and shows healthy demand from clients. However, during the first quarter of the year operational delays from a few clients led to a slower than expected start of the year for GIMSA.*

## Gruma Europe

Selected Income Statement Items (USD millions)		YoY					
		1Q25	%	1Q24	%	VAR (\$)	VAR (%)
<b>GRUMA EUROPE</b>	Sales Volume <sup>1</sup>	105		108		(3)	(3)
Corn flour, tortillas, and other	Net Sales	114.8	100.0	107.4	100.0	7	7
	Operating Income	7.6	6.7	6.1	5.7	2	25
	EBITDA	11.4	9.9	9.5	8.9	2	20

<sup>1</sup> All sales volume figures are expressed in thousand metric tons.

**Sales volume** decreased 3% to 105 thousand metric tons as positive results in the tortilla business, that had been consistently trending favorably, were offset by a contraction in corn milling volumes.

**Net sales** increased by 7% to US\$114.8 million in 1Q25 due to a richer sales mix in the retail tortilla business, in addition to the overall business mix favoring tortilla over corn milling.

**Cost of sales** increased 8% to US\$82.0 million resulting mainly from (1) higher raw material costs; and (2) elevated labor costs. As a percentage of net sales, cost of sales increased to 71.4% from 70.5% due to the dynamics mentioned above.

**SG&A** decreased 1% to US\$25.3 million mainly due to lower marketing expenses. As a percentage of net sales, SG&A improved to 22.0% from 23.8%.

**Other income, net**, totaled US\$0.1 million compared to an expense of US\$0.0 million in 1Q24.

**Operating income** was US\$7.6 million in 1Q25 or 25% higher compared to US\$6.1 million in 1Q24. Operating margin expanded 100 basis points to 6.7% from 5.7%.

**EBITDA** was US\$11.4 million, an improvement of 20% from US\$9.5 million in 1Q24, and EBITDA margin increased 100 basis points to 9.9% from 8.9% in 1Q24.

*This subsidiary continues to see strong retail growth momentum as it adds distributors across the continent. This focus on a richer mix is reflected in 20% EBITDA growth and 24% growth in EBITDA per ton terms. We have a positive outlook on this subsidiary's future performance as it continues to carry out its strategy in 2025.*

## Gruma Asia & Oceania

Selected Income Statement Items (USD millions)		YoY					
		1Q25	%	1Q24	%	VAR (\$)	VAR (%)
<b>GRUMA ASIA &amp; OCEANIA</b>							
	Sales Volume <sup>1</sup>	25		25		0	2
Corn flour, tortillas, and other	Net Sales	66.8	100.0	65.4	100.0	1	2
	Operating Income	5.7	8.5	7.1	10.9	(1)	(20)
	EBITDA	8.6	12.9	9.8	14.9	(1)	(11)

<sup>1</sup> All sales volume figures are expressed in thousand metric tons.

**Sales volume** rose 2% to 25 thousand metric tons due to increased economic activity in Malaysia and solid performance in Australia, offsetting lackluster commercial activity in China.

**Net sales** increased 2% to US\$66.8 million, in line with sales volume growth.

**Cost of Sales** increased by 6% to US\$46.1 million during the quarter due mainly to (1) indirect manufacturing costs; and (2) higher labor costs, when compared to 1Q24. As a percentage of net sales, it increased to 69.0% from 66.7% in 1Q24.

**SG&A** increased 2% to US\$15.0 million, as a result of (1) higher marketing costs; and (2) higher commissions in line with higher sales. As a percentage of net sales, SG&A remained at 22.4%.

**Operating Income** decreased by 20% to US\$5.7 million, while operating margin was 8.5% compared to 10.9% in 1Q24.

**EBITDA** decreased by 11% to US\$8.6 million, and EBITDA margin decreased 200 basis points to 12.9% from 14.9% in 1Q24.

*Healthy demand in GRUMA's Asia and Oceania subsidiary continues its momentum, supporting volume and sales growth even without any tangible growth from China during 1Q25; the additional costs incurred this quarter should subside during the year, bringing profitability to its normalized levels.*

## Gruma Centroamérica

Selected Income Statement Items (USD millions)		YoY					
		1Q25	%	1Q24	%	VAR (\$)	VAR (%)
<b>GRUMA CENTROAMÉRICA</b>	Sales Volume <sup>1</sup>	59		58		1	2
Corn flour and other	Net Sales	96.6	100.0	95.9	100.0	1	1
	Operating Income	14.1	14.6	13.5	14.1	1	4
	EBITDA	16.2	16.8	15.5	16.1	1	5

<sup>1</sup> All sales volume figures are expressed in thousand metric tons.

**Sales volume** increased 2% to 59 thousand metric tons as a result of higher demand for corn flour products in all the markets this subsidiary serves.

**Net sales** increased 1% to US\$96.6 million, in line with (1) volume growth; and (2) a more profitable product mix relative to 1Q24.

**Cost of sales** decreased 2% to US\$58.0 million due to efficiencies. As a percentage of net sales, cost of sales improved to 60.1% from 62.0%.

**SG&A** increased 7% to US\$24.5 million due to (1) elevated distribution costs; and (2) higher marketing costs relative to 1Q24. As a percentage of net sales, SG&A increased to 25.4% from 23.9%.

**Operating income** increased 4% to US\$14.1 million and operating margin increased 50 basis points to 14.6% from 14.1% as a result of the dynamics mentioned above.

**EBITDA** increased 5% to US\$16.2 million from US\$15.5 million in 1Q24, and EBITDA margin expanded 70 basis points to 16.8% from 16.1%.

*GRUMA Central America continues to see high demand for its products across its markets, reaching EBITDA growth of 5% and a 16.8% EBITDA margin, or 2% EBITDA per ton. We look forward to adding additional capacity to satisfy the incremental demand.*

## Other Subsidiaries and Eliminations

**Operating income** was US\$10.6 million, up from US\$4.2 million in 1Q24 due to higher corporate results, in addition to favorable performance in other subsidiaries

## CONFERENCE CALL

The first quarter conference call will be held on Thursday, April 24, 2025, at 12:30 pm Eastern Time (10:30 am Monterrey Time). To access the call, please dial: domestic US +1 (877) 407-0784, international +1 (201) 689-8560.

## ACCOUNTING PROCEDURES

The consolidated figures have been prepared in accordance with the Accounting International Financial Reporting Standards (IFRS). The consolidated financial statements are presented in U.S. dollars, currency that corresponds to the presentation currency of the Company. The results of the entities that have a functional currency which differs from the Company's presentation currency are translated into U.S. dollars applying the average exchange rate for the period. Nevertheless, under the section "Subsidiary Results of Operations" and the table "Financial Highlights by Subsidiary" of this report, figures for GIMSA were translated into U.S. dollars using a convenience translation at the exchange rate of Ps.20.3182/dollar as of March 31, 2025. The differences between the use of convenience translation and the average exchange rate for the period are recorded under the line "Convenience Translation Effect" of the same table.

## ABOUT GRUMA

Since 1949, GRUMA, S.A.B. de C.V., is one of the world's leading tortilla and corn flour producers. With leading brands in most of its markets, GRUMA has operations in the United States, Mexico, Central America, Europe, Asia and Oceania. GRUMA is headquartered in San Pedro Garza García, Mexico, and has approximately 25,000 employees and 75 plants. In 2024, GRUMA had net sales of US\$6.5 billion, of which 73% came from non-Mexican operations. For further information, please visit [www.gruma.com](http://www.gruma.com).

*This report may contain certain forward-looking statements and information relating to GRUMA, S.A.B. de C.V., and its subsidiaries (collectively, "GRUMA") that are based on the beliefs of its management as well as assumptions made by and information then available to GRUMA. Such statements reflect the views of GRUMA with respect to future events and are subject to certain risks, uncertainties, and assumptions. Many factors could cause the actual results, performance, or achievements of GRUMA to be materially different from historical results or any future results, performance, or achievements that may be expressed or implied by such forward-looking statements. Such factors include, among others, changes in economic, political, social, governmental, business, or other factors globally or in Mexico, the United States, Latin America, or any other countries in which GRUMA does business, and world corn and wheat costs. If one or more of these risks or uncertainties materializes, or underlying assumptions are proven incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected, or targeted. GRUMA does not intend, and undertakes no obligation, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.*

Under no circumstances should the contents of this report be construed as a solicitation to purchase any securities of GRUMA.*

## Financial position, liquidity and capital resources [text block]

### FINANCIAL POSITION

March 2025 versus December 2024

#### Balance Sheet Highlights

**Total assets** increased 5% compared to December 2024, to US\$4.7 billion. This change was mainly due to a 12% rise in inventories due to the harvest outlook in Mexico, in addition to a 2% higher Property Plant and Equipment balance.

**Total liabilities** rose by 5% to US\$2.7 billion, mainly due to a 7% increase in total debt in line with inventory growth.

**Majority shareholders' equity** increased 5% to US\$2.0 billion.

#### Debt Profile

GRUMA's debt increased 7% to US\$1.8 billion in connection with working capital financing; GRUMA's Net Debt/ EBITDA multiple remained stable at 1.2x. Approximately 69% of GRUMA's debt was USD denominated.

## CAPITAL EXPENDITURE PROGRAM

GRUMA's capital expenditures totaled US\$50 million in 1Q25, allocated mostly to the following projects during the quarter: (1) operational equipment replacement in the U.S. coupled with the purchase of land for capacity expansion in our milling operation; (2) general upgrades and maintenance across the company, particularly at GIMSA; and (3) additional capacity in Guatemala.

## Internal control [text block]

---

We carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer, as appropriate to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision and with the participation of our management, including our Board of Directors, Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer and other personnel, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework (v.2013) by the Committee of Sponsoring Organizations of the Treadway Commission.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting IFRS as issued by IASB. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting IFRS, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on our evaluation under the framework in Internal Control—Integrated Framework (v.2013), our management concluded that our internal control over financial reporting was effective.

There has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely that could materially affect, our internal control over financial reporting.

---

## Disclosure of critical performance measures and indicators that management uses to evaluate entity's performance against stated objectives [text block]

---

Management evaluates operating and financial indicators to measure improvement or deterioration of the company's performance; the main operating indicators include profitability as a percentage of sales and those demonstrating profitability of investment such as EBITDA, ROIC, ROE and ROA; liquidity, leverage and hedging ratios are also assessed.

---

## [800007] Annex - Financial derivate instruments

### Management discussion about the policy uses of financial derivate instruments, explaining if these policies are allowed just for coverage or for other uses like trading [text block]

---

#### 1. Derivative financial instruments contracting policies.

Gruma's policies regarding financial instruments establish that the acquisition of any derivative financial instruments agreement must be associated with the hedging of an underlying operation of the company, such as the purchase of inventory or fuel consumption (commodities), interest payment at a determined rate, foreign currency payments at an exchange rate, among others.

Gruma has a Risks Management policy that details the procedure to authorize their contracting.

#### 2. General description of the objectives for using derivative financial instruments.

The availability and price of corn and other agricultural commodities are subject to important fluctuations due to factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests. The objective of using derivative financial instruments is to reduce the aforementioned risks.

Also, in the normal course of business, Gruma enters into transactions in which it could be exposed to risks due to changes in the interest rates or fluctuations of the exchange rates. The variations in the exchange rates can result from changes in the economic conditions, tax and monetary policies, volatile conditions, global markets liquidity, international and local political events, among others. In order to minimize these risks Gruma has entered into certain financial instruments.

#### 3. Instruments used and hedging or negotiation strategies implemented.

We hedge a part of our production requirements through futures, swaps and options contracts in order to minimize the risk generated by the fluctuations in the price and supply of corn, wheat, soybean oil, natural gas and diesel, risks that exist as an ordinary part of our business.

Additionally, Gruma has entered into various financial instruments such as interest rate swaps and foreign exchange forwards (FX).

#### 4. Allowed negotiation markets and eligible counterparties.

In order to minimize the counterparty solvency risk, Gruma enters into derivative financial instruments only with major national and international financial institutions, using mainly when

applicable depending on the derivative instrument used, the standard International Swaps and Derivatives Association, Inc. ("ISDA") authorized forms and long form confirmation agreements.

5. Policies on the appointment of calculation or valuation agents.

Gruma appoints the counterparties as calculation agents who periodically send the account statements of the open positions of the financial instruments.

6. Policies on margins, collaterals, credit lines, VAR.

The Central Risks Committee of Gruma establishes that the derivative financial transactions may be performed with collaterals or using credit lines for that purpose.

The majority of the executed transactions establish certain obligations on behalf of the Issuer to guarantee, from time to time, the differential between fair value and the credit line (risk margin) established with the respective financial institutions, consequently the timely compliance of those obligations are assured. Additionally, it is made clear that, upon failure to fulfill the obligations of providing collateral, the counterparty will have the right, but not the obligation, to early terminate the transactions in place, and to demand the corresponding consideration pursuant to the agreed terms. In addition, and in order to maintain a risk exposure level within the boundaries authorized by the Central Risks Committee and the Audit Committee, the Corporate Treasury department reports, in a weekly and monthly manner, the information about the Derivative Financial Instruments to the Central Risks Committee, and quarterly to the Audit Committee and the Board of Directors.

As of March 31 2025, Gruma has margin calls with their counterparty for \$1,244 thousand dollars.

7. Internal control procedures to manage the exposure to market and liquidity risks.

The Corporate Treasury and the Finance Department of each region in which the company has operations, evaluate the changes in the exposure of the derivative financial instruments and periodically informs them to the Chief Financial Officer, and the latter informs Chief Executive Officer and the Central Risks Committee when the market conditions have materially changed. The execution of the derivative financial instruments is authorized pursuant to the guidelines set forth in the Risks Management policy of the company.

8. Existence of an independent third party who reviews the aforementioned procedures.

The procedures are reviewed in the external audit process performed by PricewaterhouseCoopers, S. C. annually.

9. Information regarding the authorization of the use of derivatives and if there is a committee in charge of giving those authorizations and the derivatives risk management.

All derivative financial transactions must be previously authorized by a Divisional Risks Committee and by the Central Risks Committee which is formed by members of the senior management and is designated by the Audit Committee and the Board of Directors.

---

## General description about valuation techniques, standing out the instruments valued at cost or fair value, just like methods and valuation techniques [text block]

---

### 10. Description of methods, valuation techniques and valuation frequency:

Derivative financial instruments that are not reported as hedging instruments for accounting purposes are initially recorded at fair value. The result of this valuation is recognized in the income statement. All accounting records comply with applicable regulations and are based on the official financial statements of each Financial Institution.

For derivative financial instruments that qualify as cash flow hedges, the effects of changes in the fair value of such derivative financial instrument are included within the other comprehensive income in equity, based on an evaluation of the hedge effectiveness. Such changes in the fair value are reclassified to income in the period when the firm commitment or projected transaction is carried out. Derivative financial instruments that qualify as fair value hedges are initially recorded at fair value and the effects of changes in the fair value are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

### 11. Clarification concerning if the valuation is performed by an independent third party or if it is an internal valuation and on which cases one or the other valuation is used. If it is performed by a third party, if his arranger, seller or counterparty of the derivative financial instrument is mentioned.

Gruma determines the fair value based on recognized market prices. When not quoted in markets, fair value is determined using valuation techniques commonly used in the financial sector. The valuation of the instrument includes an adjustment for the credit risk of the Company or the counterparty, as applicable. Regarding purchases of corn, wheat, soybean oil, natural gas and diesel futures the market values of the US Chicago and New York futures exchanges are taken as reference, through the specialized Financial Institutions engaged for such purposes. These valuations are made periodically.

### 12. For hedging instruments, explanation of the method used to determine its effectiveness, identifying the current available hedging level of the global position.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

When a hedge is no longer effective as well as when the hedge does not comply with the documentation requirements set forth in the International Financial Reporting Standards the results of the valuation of the financial instruments at their fair value are recognized in the income statement.

As of March 31, 2025, the open positions of financial instruments of corn that qualified as hedges had 100% of effectiveness.

---

### **Management discussion about intern and extern sources of liquidity that could be used for attending requirements related to financial derivate instruments [text block]**

---

13. Discussion on the internal and external sources of liquidity that could be used to attend the requirements related to derivative financial instruments.

There is potential liquidity requirements under our derivative financial instruments described in Section II below. Gruma plans to use its available cash flow as well as other available liquidity sources to satisfy such liquidity requirements.

---

### **Changes and management explanation in principal risk exposures identified, as contingencies and events known by the administration that could affect future reports [text block]**

---

14. Description of the changes in the exposure to major identified risks, its management and contingencies that could affect it in future reports.

The availability and price of corn and other agricultural commodities are subject to important fluctuations due to factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests. We hedge a part of our production requirements through futures contracts, options and swaps in order to reduce the risk generated by the fluctuations in price and supply of corn, wheat, soybean oil, natural gas and diesel, risks that exist in the normal course of our business.

Gruma contracts forwards and/or exchange rate options transactions with the intention of hedging the currency risk of the Mexican peso with respect to the U.S. dollar that impacts the price of corn purchases from operations in Mexico. Sometimes the Company also uses forwards to hedge net sales in dollars of exports of some local divisions in order to secure margins. The variations in the exchange rate can result from changes in the economic conditions, tax and monetary policies, volatile conditions, global markets liquidity, international and local political events, among others.

15. Disclosure of eventualities, such as changes on the value of the underlying asset, which cause it to differ from the one originally agreed, that modify it, or that the hedging level has changed, pursuant to which the issuer is required to assume new obligations or affect its liquidity.

Gruma defines its hedging strategies based on purchase plans that forecast volumes, prices, and purchase dates of its main inputs. Purchasing plans are prepared by the procurement teams of each division and are authorized by the Executive Committee.

It is possible that over the time, the purchase expectation for inputs may change against the originally authorized purchase plan. In this case, the hedging strategy against the expected new exposure is reviewed and, if necessary, the hedges contracted with the authorization of the Central Risks Committee are modified. In these cases, the effectiveness of the coverage is re-evaluated, and in the event that part or all of the coverage is determined to be ineffective, the result would be recognized in the income statement.

16. Include Influence on results or cash flow of the mentioned derivative transactions:

	March 31, 2025	
	Notional Amount	Fair Value (Thousand dollars)
<b>Current Assets:</b>		
Corn futures (b) (*)	4,440,000 Bushels	\$ 640

Margin calls (c)		(1,244)
Total current liabilities of derivate financial instruments		<u>\$ 1,545</u>
Total assets net of derivate financial instruments		<u>\$ 7,388</u>

a) Cash flow hedging: For cash flow hedge transactions, changes in the fair value of the derivative financial instrument are included as other comprehensive income in equity, based on the evaluation of the hedge effectiveness.

(b) Fair value hedge: Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

(c) Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realize the asset and settle the liability simultaneously. The amount of \$1,244 thousand dollars represents only those margin calls required to the Company that are offset for purposes of the financial statements.

(\*) Correspond to short positions.

17. Description and number of the derivative financial instruments that had expired during the quarter and those which its position has been closed:

GRUMA S.A.B. DE C.V. AND SUBSIDIARIES  
 TERMINATED OPERATIONS OF DERIVATIVE  
 FINANCIAL INSTRUMENTS OF CORN, WHEAT,

RECOGNIZED IN INVENTORIES	(1,656)

18. Description and number of the margin calls presented during the quarter.

As of March 31, 2025, the company has revolving funds denominated “margin calls” for \$1,244 thousand dollars.

The margin calls are required upon the variations in the prices of the underlying asset as collateral in favor of the counterparty to reduce the risk of non-payment in an event of default.

19. Disclosure of any breach that has been presented to the respective agreements.

The company has complied with all obligations under its derivative financial instrument’s agreements.

### Exchange Rate Derivative Financial Instruments

20. Type of Derivative	Purchase / Sell	21. Hedging / Negotiation purpose	Currency exchange	22. Notional Amount (Thousands of USD)		22. Underlying Asset		Fair Value (Thousands of USD)		24. Installments (Thousands of USD)		25. Collateral / Lines of credit / Guarantees (Thousands of USD)	Long / Short
				1st Quarter 2025	4th Quarter 2024	1st Quarter 2025	4th Quarter 2024	1st Quarter 2025	4th Quarter 2024	2025	2026		
Forwards	Sell	Hedge	USD-MXN	75,800	104,400	20.9353	20.9353	1,186	574	1,186	-	-	Short
Forwards	Purchase	Hedge	USD-MXN	-	13,100	-	19,3455	-	759	-	-	-	Long
Forwards	Purchase	Hedge	USD-MXN	58,000	15,000	20.3563	20.3840	(728)	419	(728)	-	-	Long
Forwards	Purchase	Hedge	USD-MXN	-	15,000	-	17,9261	-	2,122	-	-	-	Long
				137,800	147,500			458	3,874	458	-		

26. For derivative financial instruments with negotiation purposes or those whose Ineffectiveness of the hedge must be acknowledged, description of the method applied in determining the expected losses or the price sensitivity of the derivatives, including volatility.

As of March 31, 2025, the Company does not have unqualified contracts to determine expected loss.

27. Presentation of a sensitivity analysis for such transactions that includes, at least, the following elements:

a) Identification of the risks that may create losses in the issuer for derivative transactions.

b) Identification of the instruments that would create such losses.

The fair value of corn and fuels derivative financial instruments can decrease or increase in the future before the date of maturity of the instruments. These variations can be the result of factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests.

The fair value of the foreign exchange financial instruments can decrease or increase in the future before the expiration date. These variations in the exchange rate can be the result of changes in the economic, fiscal policies or monetary conditions, volatility, liquidity in global markets, international or local political events, among others.

28. Presentation of 3 scenarios (probable, possible and remote or stress) that can create negative circumstances for the issuer, identifying the assumptions and factors taken into consideration in their execution.

a) Possible scenario with a variation of at least 25% in the underlying asset's price and remote scenario with a variation of at least 50%.

As of March 31, 2025, the Company does not have unqualified contracts to determine expected loss.

29. Estimation of the potential loss reflected in the income statement and cash flow for each scenario.

30. For hedging financial instruments, indication of the level of stress or the variation of the underlying assets under which the effectiveness measures result sufficient.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

When a hedge is no longer effective as well as when the hedge does not comply with the documentation requirements set forth in the International Financial Reporting Standards the results of the valuation of the financial instruments at their fair value are recognized in the income statement.

The Company does not have this type of assets.

---

### Description of accounting policy for derivative financial instruments and hedging [text block]

---

#### **-DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES**

Derivative financial instruments are initially recognized at fair value and are subsequently re-measured at their fair value; the transaction costs are recognized in the income statement when incurred. Derivative financial instruments are classified as current, except for maturities exceeding twelve months.

Fair value is determined based on recognized market prices. When not quoted in markets, fair value is determined using valuation techniques commonly used in the financial sector. Fair value reflects the credit risk of the instrument and includes adjustments to consider the credit risk of the Company or the counterparty, when applicable.

The method for recognizing the resulting gain or loss depends on whether the derivative is designated as a hedge and the nature of the item being hedged.

For derivative financial instruments that are entered into to hedge certain risks and do not qualify for hedge accounting, the changes in the fair value of such instruments are recognized immediately in the income statement as Other income (expenses), net or Comprehensive financing cost, net, according to the nature of the hedged item.

The derivative financial instruments that the Company designates and qualifies as accounting hedges, are classified as follows:

- Hedges of the fair value of recognized assets or liabilities or a firm commitment (fair value hedge);
- Hedges of a particular risk associated with a recognized asset or liability or a highly probable forecast transaction (cash flow hedge); or
- Hedges of a net investment in a foreign operation (net investment hedge).

The Company documents at the inception of the transaction the relationship between hedging instruments and hedged items, including objectives, strategies for risk management and the method for assessing effectiveness in the hedge relationship. Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

#### **a. Fair value hedges**

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

#### **b. Cash flow hedges**

For cash flow hedge transactions, changes in the fair value of the derivative financial instrument are included as other comprehensive income in equity, based on the evaluation of the hedge effectiveness.

When option contracts are used to hedge forecast transactions, the Company designates only the intrinsic value of the options as the hedging instrument. Gains or losses related to the effective portion of the change in the intrinsic value of the options are recognized in other comprehensive income within equity. Changes in the time value of options that are related to the hedged item (aligned time value) are recognized in other comprehensive income within equity. The intrinsic value of options on foreign currency transactions is determined by reference to the spot exchange rate of the relevant market. The spread between the contracted strike price and the discounted market spot rate is defined as time value. When material, the value is discounted.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in the cash flow hedge reserve within equity. The gain or loss relating to the ineffective portion is recognized immediately in income as other income (expenses), net.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognized when the forecasted transaction is ultimately registered in the income statement. However, when the forecasted transaction recognizes a

non-financial asset or non-financial liability, the cumulative gains or losses recognized in other comprehensive income are transferred from equity and included in the initial measurement of the non-financial asset or non-financial liability.

### **c. Net investment hedge**

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized in the income statement. Gains and losses accumulated in equity are included in the income statement when the foreign operation is partially disposed of or sold.

---

## **Description of accounting policy for determining components of cash and cash equivalents [text block]**

---

### **-CASH AND CASH EQUIVALENTS**

Cash and cash equivalents include cash and short term highly liquid investments with original maturities of less than three months. These items are recognized at historical cost, which do not differ significantly from its fair value.

---

## **Description of accounting policy for earnings per share [text block]**

---

### **-EARNINGS PER SHARE**

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares outstanding during the year, excluding ordinary shares purchased by the Company and held as treasury shares. Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares, which include convertible debt and share options.

---

## **Description of accounting policy for employee benefits [text block]**

---

### **-EMPLOYEE BENEFITS**

#### **a. Post-employment benefits**

In Mexico, the Company has the following defined benefit plans:

- Single-payment retirement plan, when employees reach the required retirement age, which is 60.
- Seniority premium, after 15 years of service.

The Company has established trust funds to meet its obligations for the seniority premium. Employees do not contribute to these funds.

The liability recognized in the balance sheet in respect of defined benefit plans is the present value of the defined benefit obligation, less the fair value of plan assets. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability (asset). The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated cash outflows using discount rates in accordance with IAS 19, that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past service costs are recognized immediately in the income statement.

In the United States, the Company has saving and investment plans that incorporate voluntary employees 401(k) contributions with matching contributions of the Company in this country. The Company's contributions are recognized in the income statement when incurred.

#### **b. Termination benefits**

Termination benefits are payable when employment is terminated by decision of the Company before the normal retirement date.

The Company recognizes termination benefits as a liability at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognizes restructuring costs that represents a provision and involves the payment of termination benefits. Termination benefits that do not meet this requirement are recognized in the income statement in the period when incurred.

#### **c. Short term benefits**

Short term employee benefits are measured at nominal base and are recognized as expenses as the related service is provided. If the Company has the legal or constructive obligation to pay as a result of a service rendered by the employee in the past and the amount can be estimated, an obligation is recognized for short term bonuses or profit sharing.

---

## Description of accounting policy for financial assets [text block]

---

### **Financial assets**

#### **(i) Classification**

The Company classifies its financial assets in the following categories:

- Those to be measured at amortized cost.
- Those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss).

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

The Company classifies a financial asset to be measured at amortized cost if the asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest.

The Company classifies a financial asset to be measured at fair value through other comprehensive income if the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest.

#### (ii) Recognition

Regular purchases and sales of financial assets are recognized in the balance sheet on the trade date, which is the date when the Company commits to purchase or sell the instrument. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or the Company has transferred substantially all the risks and rewards of ownership.

#### (iii) Measurement

At initial recognition, the Company measures a financial asset at fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are recognized as expense.

After initial recognition, the Company measures financial assets at amortized cost or at fair value with changes in other comprehensive income or in results of the year.

#### (iv) Impairment

The Company applies the simplified approach, which requires expected lifetime losses to be recognized from initial recognition of the trade receivables and long-term notes and accounts receivable.

To measure the expected credit losses, the assets have been grouped based on shared credit risk characteristics and the days past since their initial recognition. The expected loss rates are based on the payment profiles of sales over a

period of 12 months before December 31, 2024, and the corresponding historical credit losses experienced within this period.

Accounts receivable and long-term receivables are canceled when there is no reasonable expectation of collection.

### **Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realise the asset and settle the liability simultaneously.

---

## **Description of accounting policy for financial instruments [text block]**

---

### **-FINANCIAL INSTRUMENTS**

Regular purchases and sales of financial assets are recognized in the balance sheet on the trade date, which is the date when the Company commits to purchase or sell the instrument. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or the Company has transferred substantially all the risks and rewards of ownership.

---

## **Description of accounting policy for financial instruments at fair value through profit or loss [text block]**

---

See description of the accounting policy for financial assets and financial liabilities.

---

## **Description of accounting policy for financial liabilities [text block]**

---

### **Financial liabilities**

#### **(i) Classification**

The Company classifies its financial liabilities to be measured at amortized cost, except for the liabilities from derivative financial instruments that are measured at fair value through profit or loss.

Debt and financial liabilities

Debt and financial liabilities that are non-derivatives are initially recognized at fair value, net of transaction costs directly attributable to them; subsequently, these liabilities are recognized at amortized cost. The difference between the net proceeds and the amount payable is recognized in the income statement during the debt term, using the effective interest rate method.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities for trading (derivative financial instruments).

#### (ii) Derecognition

Financial liabilities are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in income.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realise the asset and settle the liability simultaneously.

---

### Description of accounting policy for foreign currency translation [text block]

---

#### -FOREIGN CURRENCY

##### a. Foreign currency transactions

Transactions that are realized in a different functional currency of each consolidated entity are translated using the exchange rates effective at the date of the transaction. Monetary assets and liabilities denominated in foreign currency are translated at year-end exchange rates. The differences that arise from the translation of foreign currency transactions are recognized in the income statement.

##### b. Currency translation of entities

Currency translation of entities for subsidiaries with non-hyperinflationary economies

The financial statements of the Company's entities are measured using the currency of the main economic environment where each entity operates (functional currency). The consolidated financial statements are presented in american dollars, currency that corresponds to the presentation currency of the Company.

The financial position and results of the entities that have a functional currency which differs from the Company's presentation currency are translated as follows:

- Assets and liabilities are translated at the closing rate of the year.
- Income and expenses are translated at average exchange rates when it has not fluctuated significantly during the period.
- Equity is translated at the effective exchange rate in the date when the contributions were made and the earnings were generated.
- All resulting exchange differences are recognized in other comprehensive income as a separate component of equity denominated "Cumulative translation adjustments".

#### Currency translation of entities for subsidiaries with hyperinflationary economies

Previous to the translation to dollars, the financial statements of entities whose functional currency is from an hyperinflationary environment, are adjusted by the inflation factor in order to reflect the changes in purchasing power of the local currency. Subsequently, assets, liabilities, equity, income, costs, and expenses are translated to the presentation currency at the closing rate at the end of the period. To determine the existence of hyperinflation, the Company evaluates the qualitative characteristics of the economic environment, as well as the quantitative characteristics established by IFRS of an accumulated inflation rate equal or higher than 100% in the past three years.

The Company presents the hyperinflation effects and reporting currency translation in equity in the item cumulative translation adjustments, because it is considered that the combination of both effects meets the definition of exchange difference in accordance with IAS 21.

The Company applies hedge accounting to foreign exchange differences originated between the functional currency of a foreign subsidiary and the functional currency of GRUMA. Exchange differences resulting from the translation of a financial liability designated as hedge for a net investment in a foreign subsidiary, are recognized in "other comprehensive income" as a separate component denominated "Cumulative translation adjustments" while the hedge is effective.

#### **c. Recognition of the effects of inflation in countries with hyperinflationary economies**

The company recognize the effects of inflation in the financial information of its subsidiaries when they operate in a hyperinflationary economy.

The main procedures to apply the effects of inflation to the financial information of the subsidiary are the following:

- Non-monetary assets such as property, plant and equipment, intangible assets and inventories that are not registered in actual values at the date of the statement of financial position, as well as equity components, are restated by applying the corresponding inflation factors since the acquisition or contribution date.
- Items of the statement of comprehensive income are restated by applying the inflation factors, except for depreciation and amortization, and the cost impact of the inventories at the time of consumption.
- Gain or loss of monetary assets held is presented in income statement and is determined by applying the inflation factor of the period to the difference between monetary assets and liabilities.

**Turkey**

Starting April 2022, Turkey is considered a hyperinflationary economy due mainly to the accumulated inflation in the last 3 years that surpass the 100%. The downturn of the economic condition and the foreign exchange controls, support the conclusion that, for accounting purposes, is a hyperinflationary economy. From that date, the financial information of the subsidiary located in Turkey have been adjusted to recognize the cumulative effects of inflation with retroactive effects from January 1, 2022. These effects did not represent a significant impact in the consolidated accounts of the Company.

---

---

**Description of accounting policy for functional currency [text block]**

---

**-FUNCTIONAL AND PRESENTATION CURRENCY**

The functional currency of GRUMA, parent company, is in Mexican pesos. The presentation currency for the consolidated financial statements is the American dollar.

---

---

**Description of accounting policy for impairment of assets [text block]**

---

**-IMPAIRMENT OF LONG-LIVED ASSETS**

The Company performs impairment tests for its property, plant and equipment, right-of-use assets and intangible assets with finite useful lives, when certain events and circumstances suggest that the carrying value of the assets might not be recovered. Intangible assets with indefinite useful lives and goodwill are subject to impairment tests at least once a year.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount of an asset or cash-generating unit is the higher of an asset's fair value less costs to sell and value in use. To determine value in use, estimated future cash flows are discounted at present value, using a discount rate after tax that reflect time value of money and considering the specific risks associated with the asset. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating unit) and in some cases they are grouped to evaluate them at the operating segment level.

Impairment losses on goodwill are not reversed. For other assets, impairment losses are reversed if a change in the estimates used for determining the recoverable amount has occurred. Impairment losses are reversed to the extent that the book value does not exceed the book value that was determined, net of depreciation or amortization, if no impairment loss was recognized.

---

---

**Description of accounting policy for income tax [text block]**

---

## **-INCOME TAXES**

The tax expense of the period comprises current and deferred tax. Tax is recognized in the income statement, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized from the analysis of the balance sheet considering temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. Deferred income tax is determined using tax rates that have been approved or substantially approved at the date of the balance sheet and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized for tax loss carry-forwards not used, tax credits and deductible temporary differences, only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. In each period-end deferred income tax assets are reviewed and reduced to the extent that it is not probable that the benefits will be realized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset if the entity has a legally enforceable right to set off assets against liabilities and are related to income tax levied by the same tax authority on the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

---

## **Description of accounting policy for intangible assets and goodwill [text block]**

---

### **-INTANGIBLE ASSETS**

#### **a. Goodwill**

Goodwill represents the excess of the cost of an acquisition over the fair value of the Company's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill is tested annually for impairment and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill related to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to the operating segment.

**b. Intangible assets with finite useful lives**

Intangible assets with finite useful lives are carried at cost less accumulated amortization and impairment losses. Amortization is calculated using the straight-line method over the estimated useful lives of the assets. Estimated useful lives are as follows:

	<u>Years</u>
Non-compete agreements.....	3 - 20
Patents and trademarks.....	3 - 20
Customer lists.....	5 - 20
Software for internal use.....	3 - 7

**c. Intangible assets with indefinite useful lives**

Intangible assets with indefinite useful lives are not amortized, but subject to impairment tests on an annual basis or whenever the circumstances indicate that the value of the asset might be impaired.

**d. Research and development**

Research costs are expensed when incurred.

Costs from development activities are recognized as an intangible asset when such costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits will be obtained, and the Company pretends and has sufficient resources in order to complete the development and use or sell the asset. The amortization is recognized in income based on the straight-line method during the estimated useful life of the asset.

Development costs that do not qualify as intangible assets are recognized in income when incurred.

---

### Description of accounting policy for investment in associates [text block]

---

As of March 31, 2025, the Company has no investments in associated companies.

---

### Description of accounting policy for investments in joint ventures [text block]

---

As of March 31, 2025, the Company has no investments in business combination.

---

## Description of accounting policy for leases [text block]

---

### -LEASES

Contracts with counterparties celebrated by the Company, in which the transfer of the right to control the use of an identified asset for a certain term in exchange for a consideration, are classified as leases. There is control if the Company obtains the economic benefits from the use of the asset and has the right to direct and decide on the use of the asset during the term of the lease.

The Company applies the lease accounting model, which consists in the recognition of all leases within the statement of financial position. Contracts celebrated by the Company for more than a 12-month term and whose underlying asset has a value greater than five thousand American dollars are recognized as leases.

For contracts that contain both lease and non-lease components, the Company, in its capacity as lessee, allocates the component value as follows:

- When there is an observable individual price for each component, it is separated and allocated according to the specific individual prices of the components, and applies for all assets of that class.
- When there is no individual price for some or all the components, the components will not be separated and are accounted for as a single lease component, and applies to all assets of that class.

The term of a lease is determined based on the non-cancellable period of the lease contract, plus the optional renewable periods agreed in such contract, if the Company is reasonably certain to extend by considering factors such as: improvements made to the leased asset, penalties for not extending the contract, determination of high costs to be incurred for the replacement of the leased asset, among others; and that the extension option can only be exercised by the Company.

Lease liabilities include the net present value of the following lease payments:

- a) Fixed lease payments, minus lease incentives receivable;
- b) Variable lease payments that are based on an index or a rate;
- c) Amounts expected to be payable by the group under residual value guarantees;
- d) The exercise price of a purchase option if the group is reasonably certain to exercise that option; and
- e) Payments of penalties for terminating the lease, if the lease term reflects the group exercising that option.

For leases, the Company recognizes, at the beginning of the contract, a liability equivalent to the present value of the lease payments agreed in the contract, discounted using the incremental interest rate. After the start date, the lease liability is measured by increasing its carrying value to reflect the accrued interest and decreasing its carrying value to reflect the lease payments made.

The incremental interest rate is determined using the interest rates of comparable bonds of companies with similar credit ratings as the Company, plus the Company's credit risk factor and the risk factor from the country where the asset is located. The above mentioned is considering a similar lease contract and similar security.

For property, plant and equipment leases containing terms of variable payments in which lease payments are modified during the term of the lease, possible future increases in variable lease payments are considered as part of the lease liability. Until effective, the lease liability is reassessed, and the right-of-use asset is adjusted.

The interest expense of a lease liability is recognized monthly by applying the incremental interest rate the term of the lease.

At the beginning of the lease contract, the right-of-use asset is recognized at cost. The cost of the asset includes the present value of the lease payments agreed in the contract and the initial direct costs incurred by the Company, such as restorations or dismantling; after that date, the carrying value of the right-of-use asset is measured decreasing the accumulated depreciation and the accumulated impairment losses.

The Company applies the straight-line method for the depreciation of the right-of-use assets, which begins on the start date of the lease.

The right-of-use assets are normally depreciated in a straight line during the shortest period between the useful life of the asset and the lease term. If the Company has reasonable certainty to exercise a purchase option, the right-of-use asset depreciates over the useful life of the underlying asset.

The Company recognizes in income the payments for short-term leases or those in which the underlying asset is of low value, applying the straight-line method during the lease period.

For full or partial termination of lease contracts, the Company as lessee will recognize the new measurement of the lease liability adjusting the book value of the right-of-use asset resulting from the lease termination and the related gains or losses will be recognized in income of the year.

The Company applies impairment tests to the right-of-use assets when there are indications that the carrying value of the assets may not be recovered.

---

## Description of accounting policy for measuring inventories [text block]

---

### -INVENTORIES

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the average cost method. The net realizable value is the estimated selling price of inventory in the normal course of business, less applicable variable selling expenses. The cost of finished goods and production in process includes raw materials, direct labor, other direct costs and related production overheads. Cost of inventories could also include the transfer from comprehensive income within equity of any gains or losses on cash flow hedges for purchases of raw materials.

---

## Description of accounting policy for non-current assets or disposal groups classified as held for sale and discontinued operations [text block]

---

### **-LONG-LIVED ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS**

Long-lived assets are classified as held for sale when (a) their carrying amount is to be recovered mainly through a sale transaction, rather than through continuing use, (b) the assets are held immediately for sale and (c) the sale is considered highly probable in its current condition.

For the sale to be considered highly probable:

- Management must be committed to a sale plan.
- An active program must have begun in order to locate a buyer and to complete the plan.
- The asset must actively be quoted for its sale at a price that is reasonable to its current fair value; and
- The sale is expected to be completed within a year starting the date of classification.

Non-current assets held for sale are stated at the lower of carrying amount and fair value less costs to sell.

Discontinued operations are the operations and cash flows that can be clearly distinguished from the rest of the entity, that either have been disposed of or have been classified as held for sale, and:

- Represent a line of business or geographical area of operations.
- Are part of a single coordinated plan to dispose of a line of business or geographical area of operations, or
- Is a subsidiary acquired exclusively with a view to resale.

---

## Description of accounting policy for property, plant and equipment [text block]

---

### **-PROPERTY, PLANT AND EQUIPMENT**

Property, plant and equipment are valued at acquisition cost, less accumulated depreciation and recognized impairment losses. Cost includes expenses that are directly attributable to the asset acquisition.

Subsequent costs, including major improvements, are capitalized and are included in the carrying value of the asset or recognized as a separate asset, only when it is probable that future economic benefits associated with the specific asset will flow to the Company and the costs can be measured reliably. Repairs and maintenance are recognized in the income statement when incurred. Major improvements are depreciated during the remaining useful life of the related asset. Replacement and spare parts that the Company expects to use in more than one year and are attributable to a specific machine should be recognized within Property, plant and equipment. Leasehold improvements are

depreciated in accordance with the useful life of the improvement component or the remaining lease term. Land is not depreciated.

Costs of borrowings, general and specific, of qualifying assets that require a substantial period of time (over one year) for acquisition or construction, are capitalized as part of the acquisition cost of these assets, until such time as the assets are substantially ready for their intended use or sale.

Depreciation is calculated over the asset cost less residual value, considering its components separately. Depreciation is recognized in income using the straight-line method and applying annual rates that reflect the estimated useful lives of the assets. The estimated useful lives are summarized as follows:

	<u>Years</u>
Buildings.....	25 – 50
Machinery and equipment.....	5 – 25

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains and losses from sale of assets result from the difference between revenues of the transaction and the book value of the assets, which is included in the income statement as other income (expenses), net.

---

### Description of accounting policy for provisions [text block]

---

#### **-PROVISIONS**

Provisions are recognized when (a) the Company has a present legal or constructive obligation as a result of past events; (b) it is probable that an outflow of resources will be required to settle the obligation; and (c) the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the specific risks of the obligation. The increase in the provision due to the passage of time is recognized as interest expense.

---

### Description of accounting policy for recognition of revenue [text block]

---

## **-REVENUE RECOGNITION**

The Company produces and sells corn flour, packaged tortilla and other related products such as flat bread, snacks and corn grits. The Company serves wholesale and retail markets, as well as institutional markets. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, and there is no unfulfilled obligation that could affect the customer's acceptance of the products, the risks of loss and obsolescence have been transferred to the customer, and the customer has accepted the products in accordance with the sales contract.

Revenue from sales is recognized based on the price specified in the contract, net of discounts, volume rebates and returns. Volume rebates are estimated, using the expected value method, and revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur.

A refund liability is recognized for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No element of financing is deemed present as the sales are made with a short-term credit.

A receivable is recognized when the products are delivered as this is the point in time that the consideration is unconditional.

The payments made to customers, which represent a modification of the transaction price, are presented as a decrease of revenue.

---

## **Description of accounting policy for segment reporting [text block]**

---

## **-SEGMENT INFORMATION**

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses relating to transactions with other components of the same entity. Operating results from an operating segment are regularly reviewed by the entity's chief executive officer to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

---

## **Description of accounting policy for subsidiaries [text block]**

---

## **-SUBSIDIARIES**

The subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are incorporated in the consolidated financial statements starting on the date on which the control begins, until the date such control ceases.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Company.

At March 31, 2025, the main subsidiaries included in the consolidation are:

	<u>% of ownership</u>
Gruma Corporation and subsidiaries.....	100.00
Grupo Industrial Maseca, S.A. de C.V. and subsidiaries.....	100.00
Gruma International Foods, S.L. and subsidiaries.....	100.00
Mission Foods México, S. de R.L. de C.V.....	100.00

---

### Description of accounting policy for trade and other payables [text block]

---

#### - TRADE ACCOUNTS AND OTHER ACCOUNTS PAYABLES

These balances represent the liabilities for goods and services provided to the Company before the end of the year that have not been paid. The amounts are not guaranteed and are generally paid within 30 days of recognition. Suppliers and other accounts payable are presented as current liabilities unless the balance is not payable within 12 months after the reporting period.

The Company has established supplier financing programs, through which they can discount their documents with different financial institutions. The balance payable derived from these programs is recognized within Trade accounts payable in the consolidated balance sheet, without generating a payment obligation with the financial institution. The financial cost of these operations is by the suppliers. This supplier program is presented as an operating activity in the statement of cash flows.

Accounts payable are initially recognized at fair value and subsequently valued at amortized cost using the effective interest rate method.

---

### Description of accounting policy for trade and other receivables [text block]

---

#### -ACCOUNTS RECEIVABLE

Trade receivables are initially recognized at fair value and subsequently valued at amortized cost using the effective interest rate method, less provision for impairment. The Company has determined that the amortized cost does not represent significant differences with respect to the invoiced amount from short-term trade receivables, since the transactions do not have relevant associated costs.

Allowances for doubtful accounts or impairment represent expected future credit losses. The recognition of these losses is obliged since the moment the trade receivable is recognized.

---

## [813000] Notes - Interim financial reporting

### Disclosure of interim financial reporting [text block]

#### **BASIS OF PREPARATION**

The consolidated financial statements non-audited of Gruma, S.A.B. de C.V. and Subsidiaries for all the periods presented have been prepared in accordance with the accounting International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The accounting IFRS also include the International Accounting Standards (IAS) in force, as well as all the related interpretations issued by the IFRS Interpretations Committee, including those previously issued by the Standing Interpretations Committee. The Company applied the accounting IFRS as of March 31, 2025.

The Company's non-audited consolidated interim financial statements do not include all of the information and disclosures required in the annual financial statements, and should be read together with the Company's 2024 annual financial statements. The interim non-audited consolidated financial statements of the Company were authorized by the Chief Administrative Office on April 10, 2025, subsequent events have been considered.

#### **BASIS OF MEASUREMENT**

The consolidated financial statements have been prepared based on historical cost, except for the fair value of certain financial instruments as described in the policies shown below.

The preparation of financial statements requires that management make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results could differ from those estimates. The key factors in the estimates and assumptions remain the same as those applied in the previous year.

#### **FUNCTIONAL AND PRESENTATION CURRENCY**

The functional currency of GRUMA, parent company, is in Mexican pesos. The presentation currency for the consolidated financial statements is the American dollar.

#### **USE OF ESTIMATES AND JUDGMENTS**

The relevant estimates and assumptions are reviewed on a regular basis. The revisions of accounting estimates are recognized in the period in which the estimate is reviewed and in any future period that is affected.

In particular, the information for assumptions, uncertainties from estimates, and critical judgments in the application of accounting policies, that have the most significant effect in the recognized amounts in these consolidated financial statements are described below:

- The assumptions used for the determination of fair values of financial instruments.
- The assumptions and uncertainties with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income.

- The key assumptions in impairment testing for long-lived assets used for the determination of the recoverable amount for the different cash generating units.
- The actuarial assumptions used for the determination of employee benefits obligations.

## SEGMENT INFORMATION

The Company's reportable segments are strategic business units that offer different products in different geographical regions. These business units are managed separately because each business segment requires different technology and marketing strategies.

The Company's reportable segments are as follows:

- Corn flour and packaged tortilla division (United States):  
Manufactures and distributes more than 20 varieties of corn flour that are used mainly to produce and distribute different types of tortillas and tortilla chip products in the United States. The main brands are MASECA for corn flour and MISSION and GUERRERO for packaged tortillas.
- Corn flour division (Mexico):  
Engaged principally in the production, distribution and sale of corn flour in Mexico under MASECA brand. Corn flour produced by this division is used mainly in the preparation of tortillas and other related products.
- Corn flour and packaged tortilla and other (Europe):  
Manufactures and distributes varieties of flour that are used to produce different types of tortillas, flat breads, grits and other in the same category in Europe. The main brands are MASECA for corn flour and MISSION for packaged products.
- Other segments:  
This section represents those segments whose amounts on an individual basis do not exceed 10% of the consolidated total of net sales, operating income and assets. These segments are:
  - a) Corn flour, hearts of palm, rice, and other products (Central America).
  - b) Packaged tortillas (Mexico).
  - c) Wheat flour tortillas and snacks (Asia and Oceania).
  - d) Technology and equipment, which conducts research and development regarding flour and tortilla manufacturing equipment, produces machinery for corn flour and tortilla production and is engaged in the construction of the Company's corn flour manufacturing facilities.
  - e) Balanced feed for livestock (Mexico)

All inter-segment sales prices are market-based. The Chief Executive Officer evaluates performance based on operating income of the respective business units.

*Figures presented in thousands of american dollars, except where otherwise indicated.*

## Segment information as of March 31, 2025 and for the three months ended in the period

Thousands of Dollars	Corn flour and packaged tortilla division (United States)	Corn flour division (Mexico)	Corn flour and packaged tortilla division (Europe)	Other segments	Eliminations and corporate expenses	Total
Net sales to external customers	\$ 878,083	\$ 355,026	\$ 114,567	\$ 200,833	\$ -	\$ 1,548,509

Certain debt agreements contain a number of restrictions, mainly regarding compliance with financial ratios and delivery of financial information, which if not complied with or remedied within a certain period to the satisfaction of the creditors, could be considered as a cause for early termination. Financial ratios are calculated according with the formulas established in the credit agreements. The main financial ratios contained in the credit agreements are the following:

- Interest coverage ratio defined as the ratio of consolidated earnings before interest, tax, depreciation and amortization (EBITDA) of the last twelve months to consolidated interest charges of the last twelve months, should not be less than 2.5 times.
- Net Leverage ratio, defined as the ratio of consolidated net debt to consolidated EBITDA of the last twelve months, which should be no greater than 3.5 times

At March 31, 2025 the Company was in compliance with the financial covenants, as well as with the delivery of the required financial information. There are no indications that the Company would have difficulties complying with the restrictions in the following twelve months.

## EQUITY

The Company's outstanding common stock consists of 356,387,473 Series "B", Class I shares, amounting to \$362,061 thousand dollars.

As of March 31, 2025, the Company repurchased 9,006,802 shares.

## DIVIDENDS

At the Shareholders' Meeting of GRUMA, S.A.B. DE C.V., held on April 26, 2024, it was agreed to pay a cash dividend at a rate of \$5.04 pesos per outstanding share. This payment will be made in cash in 4 partial exhibitions, each of \$1.26 pesos on July 12 and October 11, 2024, January 10 and April 11, 2025.

## INCOME TAX EXPENSE

Thousand dollars	First Quarter	
	2025	2024
<b>Income before Income Tax</b>	<b>\$ 186,859</b>	<b>\$ 174,099</b>
Current tax	(55,259)	(54,689)
Deferred tax	(5,792)	(8,373)
<b>Total Income tax expense</b>	<b>\$ (61,051)</b>	<b>\$ (63,062)</b>
<b>Effective income tax (%)</b>	<b>(32.7)</b>	<b>(36.2)</b>

## CONTINGENCIES

The Company and its subsidiaries are subject to litigation arising during the normal course of business. It is the Company's policy to accrue for amounts related to these legal matters if it is probable that a liability has been incurred and an amount is reasonably estimable. In the opinion of the Company, the resolution of these matters will not have a material adverse effect on the Company's consolidated financial statements.

## Description of significant events and transactions

### MEXICAN FEDERAL ECONOMIC COMPETITION COMMISSION ("COFECE") INVESTIGATION AND PRELIMINARY OPINION

On October 7, 2024, the Investigative Authority of the Mexican Federal Economic Competition Commission ("COFECE") notified the Company of its preliminary investigative opinion regarding an investigation that was initiated in November 2022 (the "Preliminary Opinion"), of certain markets in connection with the distribution and commercialization of corn, as well as for the production, commercialization, and distribution of corn flour and related services within Mexico (the "Investigated Markets"), whereby it preliminarily determined that, "there are no conditions of effective competition in the markets for the production, commercialization, and distribution of white and blue corn flour in bulk for the commercial manufacture of corn flour tortillas, with a regional geographic dimension ("Relevant Markets"), due to the probable existence of a barrier to competition and free market access."

In its Preliminary Opinion the Investigative Authority of COFECE proposed several corrective measures aimed at eliminating the competition barriers that it alleges to have preliminarily identified, in order to solve the alleged lack of effective competitive conditions in the Relevant Markets, highlighting its proposal to divest 5 of the 18 nixtamalized corn flour mills in Mexico which are indirectly owned by GRUMA, located in the cities of Chalco, Culiacan, Rio Bravo, Veracruz, and Celaya (the "Relevant Assets"), by their sale in a maximum term of 2 years, pursuant to an

execution schedule that would commence once a resolution issued by COFECE's plenary meeting, if any, becomes effective.

Moreover, in its Preliminary Opinion, COFECE's Investigating Authority proposed corrective measures in connection with certain marketing strategies, to be adopted by GRUPO INDUSTRIAL MASECA, S.A. DE C.V. and its subsidiaries ("GIMSA"), also pursuant to a proposed execution schedule which would commence once a resolution issued at COFECE's plenary meeting, if any, becomes effective.

The Preliminary Opinion and the proposed corrective measures are preliminary in nature and are based on the information that COFECE's Investigative Authority had at its disposal. Therefore, the requirement to comply with the proposed corrective measures in the Preliminary Opinion, that are related to the divestment of the Relevant Assets and the marketing strategies to be adopted by GIMSA, are subject to the issuing of the resolution by COFECE's plenary meeting and subject to GRUMA having exhausted all legal actions and remedies available under applicable law.

With conviction that the Company's actions have always adhered to the applicable law, the Company has cooperated openly and in good faith with COFECE since the beginning of the investigation of the Investigated Markets, and will continue to cooperate in the same manner to protect the interests of the Company's shareholders, employees, customers, and consumers.

In accordance with applicable law, on December 9, 2024, the Company timely and properly submitted its objections to the Preliminary Opinion before COFECE, including defense arguments and evidence to refute the preliminary conclusions of the Investigative Authority.

As of this date, the Company's submitted response has been admitted by COFECE, as well as all the evidence that was offered by GRUMA, consisting mainly of documentary evidence and expert opinions in the fields of economics, food chemistry, and process engineering; therefore, the process is currently at the stage of presentation of expert opinions. Once the admitted evidence has been presented, COFECE's plenary meeting will be able to order the presentation of additional evidence and upon such evidence being presented, if applicable, the plenary meeting will establish a term for delivery of closing arguments, for such plenary meeting to issue its resolution, which may be challenged by the Company through legal means. Throughout this process, the Company has the right to present alternative solutions to the divestiture of assets or other adequate and economically feasible measures acceptable to COFECE's plenary meeting to solve the competition concerns that were expressed in the Preliminary Opinion by COFECE's Investigative Authority that would have been confirmed by its plenary meeting.

Considering the preliminary nature of the measures proposed by the Investigative Authority in its Preliminary Opinion, it is not currently possible to predict the outcome of COFECE's plenary meeting's final resolution and the result of the legal proceedings that may result therefrom, nor the effect that the foregoing would have on the operating income and financial position of the Company.

## **IMPACTS OF THE CONFLICT IN UKRAINE**

During February 2022, Russian military forces invaded Ukraine. This has resulted in the imposition of sanctions on Russia and Belarus by the United States of America, the United Kingdom, the European Union and other countries, as well as counter sanctions imposed by Russia to such countries. This has caused an abrupt change in the geopolitical situation, with significant uncertainty about the duration of the conflict.

The conflict has also contributed to increase volatility in foreign exchange markets, energy prices, raw materials and other input costs, as well as supply chain tensions and rising inflation in many countries.

The Company has assessed the consequences of this conflict in the consolidated financial statements, with the following conclusions:

Assessment of control: In accordance with IFRS 10 "Consolidated Financial Statements" the Company has evaluated and confirms that the changes in the legal and operating environment of its subsidiaries located in Russia and Ukraine have not affected the ability to exercise control over the entities in these countries.

The impact in the first quarter of 2025, in the operations of the subsidiaries located in Ukraine and Russia, was not material to consolidated revenues, operating income and consolidated financial position.

The Company will continue to monitor the events resulting from this ongoing conflict, evaluating the options available to try to mitigate a greater risk of loss and we will continue to evaluate the possible impact on the investment in these subsidiaries.

---

### **Description of accounting policies and methods of computation followed in interim financial statements [text block]**

---

The interim consolidated financial statements have been prepared in accordance with the same accounting policies and methods as in the preparation of the audited consolidated financial statements for the most recent year, except for income tax expense. For interim reporting, the Company determines the income tax expense using the annual average effective rate for its most important subsidiaries.

See section of accounting policies and calculation methods in [800600 - Notes - List of Accounting Policies]

---

### **Explanation of seasonality or cyclicity of interim operations**

---

The Company's products do not have significant seasonality, however the sales volume of some products change slightly during the year.

---

### **Explanation of nature and amount of items affecting assets, liabilities, equity, net income or cash flows that are unusual because of their nature size or incidence**

---

There are no significant effects on assets, liabilities, equity, net income or cash flows, due to items that are unusual due to their nature, amount and incidence.

---

### Explanation of nature and amount of changes in estimates of amounts reported in prior interim periods or prior financial years

---

There are no changes in estimates.

---

### Explanation of issues, repurchases and repayments of debt and equity securities

---

The Company does not have repayments of debt and equity securities.  
As of March 31, 2025, the Company repurchased 9,006,802 shares.

---

<b>Dividends paid, ordinary shares:</b>	22,034,000
<b>Dividends paid, other shares:</b>	0
<b>Dividends paid, ordinary shares per share:</b>	0.0613
<b>Dividends paid, other shares per share:</b>	0

---

### Explanation of events after interim period that have not been reflected

---

There are no subsequent events after the reporting period that need to be disclosed.

---

### Explanation of effect of changes in composition of entity during interim period

---

There are no changes in the Company's composition.

---

## Description of compliance with IFRSs if applied for interim financial report

---

### **-BASIS OF PREPARATION**

The consolidated financial statements non-audited of Gruma, S.A.B. de C.V. and Subsidiaries for all the periods presented have been prepared in accordance with the accounting International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The accounting IFRS also include the International Accounting Standards (IAS) in force, as well as all the related interpretations issued by the IFRS Interpretations Committee, including those previously issued by the Standing Interpretations Committee

---

## Description of nature and amount of change in estimate during final interim period

---

There are no changes in estimates.

---

## Footnotes

[1] ↑

—

The depreciation and amortization expense in 2023 presented in this section and the one disclosed in the Cash flow statement [520000], includes mainly a non-monetary charge in the operating results of the second quarter of 2023 for \$4,667 thousand dollars due to the goodwill impairment associated with the corn flour packaged tortilla United States segment.
